

EDIT - bug #6229

Implement multi-language support for MultiLanguage textes everywhere

11/30/2016 12:58 PM - Andreas Müller

Status:	New	Start date:	
Priority:	New	Due date:	
Assignee:	Katja Luther	% Done:	0%
Category:	taxeditor	Estimated time:	0:00 hour
Target version:	Unassigned CDM tickets	Found in Version:	
Severity:	normal		
Description			
Currently only a few multi-language attributes are really supported by the Editor. These are TextData.multilanguageText and TaxonNode.excludedNote. A similar implementation also exists for term representations.			
Not yet implemented is:			
TaxonInteraction.description IndividualsAssociation.description DescriptionElementBase.modifyingText KeyStatement.label StateData.modifyingText Media.title Media.description SpecimenOrObservationBase.definition Classification.description			
Some of them are even not yet implemented as simple fields.			
On model side we should also check if it is not possible now to use the existing eu.etaxonomy.cdm.model.common.MultilanguageText class. Long time ago hibernate did not support this due to a hibernate bug or missing feature.
