##### #6 - 02/08/2017 11:22 AM - Katja Luther

- Assignee changed from Katja Luther to Andreas Müller

##### #7 - 02/16/2017 09:26 PM - Andreas Müller

Generally works, but if name could not be deleted (because in use) 2 warning appear, first is about synonym delete, second about misapplication delete.

Maybe also [#6424](#) is a related issue or even a regression

**#8 - 02/16/2017 09:27 PM - Andreas Müller**

- % Done changed from 50 to 90

The 2 warnings do not show up anymore so we can close this ticket.

However, I am a bit astonished that no warning exists at all. I thought I remembered that if the name can not be deleted a warning/message appears that it could not be deleted. However, this is not the case anymore. I tested also for deleting a TaxonNode with a name that is in use and also not warning exists anymore so this issue does not seem to be only a synonym name issue.

If the observed behavior is the expected behavior feel free to close the ticket.

**#13 - 01/18/2021 02:22 PM - Andreas Müller**

- Related to bug #9398: *ObjectNotFoundException* when removing a synonym that is used as NameInSource added

**#14 - 01/20/2021 11:54 AM - Katja Luther**

- Status changed from Feedback to Closed

now isDeletable checks also for name isDeletable and adds a warning if name can't be deleted.
