EDIT - feature request #6313

Improve browser functionality of breadcrumbs

01/06/2017 10:29 AM - Andreas Müller

Status:	New		**Start date:**	
Priority:	New		**Due date:**	
Assignee:	Andreas Kohlbecker		**% Done:**	0%
Category:	cdm-dataportal		**Estimated time:**	0:00 hour
Target version:	Unassigned CDM tickets			
Severity:	normal			

Description

Copied from #5852

An other issue to become a full replacement of the classification tree is, that browsing is more difficult. To go to an other taxon not being a sibling but e.g. the child of a parent sibling, you first need to click (and load!!) the parent sibling, before you can click the taxon you want to go to. Especially on mobile devices this is a disadvantages as you may need to enlarge the intermediate side first before clicking to the next taxon. Same holds for browsing the tree from top where you have to open each taxon on the path down to the taxon you search for. We should think about ways how to improve this.
