EDIT - bug #6393

bug # 6382 (Closed): option to supply user credentials in the admin setting for the freetext index triggers

manage/* web service can be used by ajax requests

01/27/2017 02:08 PM - Andreas Kohlbecker

Target version:	Release 4.6			
Severity:	normal		**Found in Version:**	

Description

As of /manage/* requiring authentication these services can no longer be used via ajax with cross domain requests. Until now we where using jsonp requests, but these are by their nature not possible with http basic authentication.
The following means are needed now:

- the service /manage/* is accepting HTTP OPTION requests without authentication
- the servicees /manage/* and /progess/* must add CORS access control headers in its response
- the cdmlib-remote-webapp/src/main/webapp/js/cdm_ws_progress.js must be adapted accordingly
