Target version:	Unassigned CDM tickets		
Severity:	normal		

Description

Sometimes it is needed that the alternatives of a polytomous key node are sorted in a different way. We need an operation change order of the nodes.
For a node with only two alternatives it would be a switch, but for more than one we need to have a possibility to define the sort order of all alternatives.

History

#1 - 04/24/2020 04:07 PM - Andreas Müller

- Subject changed from change sortindex of keynodes to Change sortindex of keynodes

- Description updated

Why can't we have a simple move up/move down functionality via the menu as we have for other lists, e.g. in image galleries? Is this difficult to implement? If not, can we integrate it into one of the next milestones or in the current one if very easy?
