

EDIT - feature request #6442

Feature block settings: margins for data in block level elements

03/01/2017 11:30 AM - Andreas Kohlbecker

Status:	Closed	Start date:	
Priority:	Highest	Due date:

Target version:	Release 4.7		
Severity:	normal		

Description

If div is selected for the enclosing tag it is often desirable to display the resulting text blocks as paragraphs with a margin. This could be easily achieved by also allowing to use p as enclosing tag.

example *Nepenthes gracillima*:

http://caryophyllales.org/nepenthaceae/cdm_dataportal/taxon/53d8bdee-f688-4c98-a90a-ef794bc23845

This page has a 'Notes' feature block containing multiple feature elements. The feature elements should be separated by space. This is currently only possible by applying a margin rule per css style rule. Since having a space inbetween the feature elements is expected to be a common requirements this should be configurabel via the settings.

I removed the style

```
#Notes .DescriptionElement-TextData {  
  margin-bottom: 1em;  
}
```

again from the nepenthaceae portal theme setting, you can choose p once the release is deployed to achieve the same effect.

Not sure anymore what this ticket is all about. Can you leave me a note how and what to test?

What exactly is meant by "rom the nepenthaceae portal theme setting, you can choose p"?

- *Description updated*

#7 - 06/16/2017 08:20 AM - Andreas Kohlbecker

The like this:

- see the "Notes" feature elements having no space:
http://caryophyllales.org/nepenthaceae/cdm_dataportal/taxon/53d8bdee-f688-4c98-a90a-ef794bc23845
- got to
http://caryophyllales.org/nepenthaceae/admin/config/cdm_dataportal/settings/layout/taxon#edit-feature-block-settings-b5780b45-6439-4f3c-9818-d89d26d36eb2 and select 'p' as element tag & save the changes
- see the "Notes" feature elements being separated by space now
