

EDIT - feature request #6457

Views should be available via right mouse click

Severity:	normal		

Description

Often one wants to have a look to certain aspect of a record displayed in some editor that requires opening an extra view. Currently one needs to open the view via the windows-show view menu.

This is not very comfortable as it takes time to move up to the main menu. A more comfortable way would be to have "show in view" functionality directly via right mouse click. Similar to "open in" functionality.
