

EDIT - feature request #6460

Refactor referencing objects in a way that supplemental data know what object they belong to

03/02/2017 11:25 AM - Andreas Müller

Status:	Closed	Start date:	
Priority:	New	Due date:	
Assignee:	Andreas Müller	% Done:	100%
Category:	cdmlib	Estimated time:	0:00 hour
Target version:	Release 5.36		
Severity:	normal		
Description			
Currently the referencing objects view does not give much information about e.g. original sources. As the source does not link to the sourceable object it belongs to this information can not be shown. To avoid performance overhead we should compute this information on server side within the service call.			
For this we may want to have DTO returned instead of CdmBases. This DTO could also compute the required additional information that currently is computed in the TaxEditor.

- Related to feature request #6697: reconstruct getReferencingObjects to return DTOs added

#2 - 03/24/2022 02:44 PM - Andreas Müller

- Related to feature request #9541: Improve referencing objects handling added

#3 - 03/24/2022 02:46 PM - Andreas Müller

- Status changed from New to Resolved

- Target version changed from Unassigned CDM tickets to Release 5.44

- % Done changed from 0 to 50

This was probably already fully implemented some time ago. Please check.

Also check related tickets.

#4 - 03/08/2023 03:52 PM - Andreas Müller

- Status changed from Resolved to Closed

- % Done changed from 50 to 100

At least for description sources this works now and shows deb information correctly starting in 5.36

#5 - 03/20/2023 03:37 PM - Andreas Müller

- Target version changed from Release 5.44 to Release 5.36
