

## EDIT - bug #6500

### Remaining issues for volume formating in generic references

03/13/2017 09:36 PM - Andreas Müller

<b>Status:</b>	New	<b>Start date:</b>	
<b>Priority:</b>	Highest	<b>Due date:</b>	
<b>Assignee:</b>	Belen Escobari	<b>% Done:</b>	0%

<b>Target version:</b>	Release 5.45	<b>Found in Version:</b>	
<b>Severity:</b>	normal		
<b>Description</b>			
This seems to be fixed for simple reference (see test "testGenericMissingVolume"). For inferences it is unclear what the expected result should be.			
Should the result include the volume of the reference but not of the inference? - I think yes.			
Should the result include the volume of the inference if the reference has no volume? - I think yes.			
Should this hold for both nomenclatural citation as well as bibliographic citation? - I think yes.
