<b>Target version:</b>	Unassigned CDM tickets	<b>Found in Version:</b>	
<b>Severity:</b>	normal		

#### Description

Current wizard has several issues:

- don't call it wizard, it is only 1 form, call it dialogue, form or what ever is suitable
- it is often very large in height, e.g. it takes the complete height of the screen with a lot of empty space between "Open in Editor" and Finish/Cancel buttons
- Better handling of "Open in Editor". Best solution: use 3 buttons "Finish", "Open", "Cancel". Maybe we should also remove this for editing the node, as it is only relevant for creation where you usually want to edit the taxon afterwards
- Use same space between components (e.g. between "Taxon" and "Taxon is unplaced" there is less space then between other components
- Use separators, e.g. between "Related persons and teams" and other components
- Use indentation for "Excluded Notes"
- Disable Excluded Notes if "Taxon is excluded" in a way that it is obviously disabled (e.g. make label and text box grey)
- Put checkboxes together (Taxon is unplaced and Taxon is excluded), e.g. by moving "Related persons or teams" down
