

EDIT - bug #6539

Build problems for taxeditor post 4.6 release

03/23/2017 05:51 PM - Patrick Plitzner

Status:	Closed	Start date:	
Priority:	Highest	Due date:	
Assignee:	Patrick Plitzner	% Done:	100%
Category:	taxeditor	Estimated time:	0:00 hour
Target version:	Release 4.7	Found in Version:	
Severity:	normal		
Description			
<p>There were and still are several problems with the building the taxeditor. Some of them have to do with the switch to Java 8. This ticket should be used to solve them and also collect the information what has been done so far.</p> <p>Missing Constraint: Bundle-RequiredExecutionEnvironment: JavaSE-1.8</p> <p>It seems like this happens because we still build against Eclipse indigo and its osgi plugin cannot handle Java 8 (http://stackoverflow.com/questions/24669940/java-8-missing-required-capability-require-capability-osgi-ee-filter-osgi)</p> <p>Scenarios I tried:</p> <ul style="list-style-type: none">• setting the Bundle-RequiredExecutionEnvironment to 1.7 ** fixes the problem but we already make use of Java 8 syntax which then causes the maven compiler to fail.• Completely deleting Bundle-RequiredExecutionEnvironment ** lets the compiler fail due to Java 1.6 syntax like e.g. <>• <i>only for Eclipse workspace</i>: Removing the old (indigo) osgi plugin from the target platform lets the editor start from the workspace with Bundle-RequiredExecutionEnvironment 1.8 <p>A zip file cannot include itself</p> <p>This happened when increasing the tycho version to 1.0.0</p> <ul style="list-style-type: none">• SOLVED: by deleting output.. = bin/ from build.properties <p>Missing requirement ... org.eclipse.objectteams.otdt.core.patch.feature.group</p> <ul style="list-style-type: none">• SOLVED: by adding the feature org.eclipse.jdt instead of the plugins (see https://dev.eclipse.org/mhonarc/lists/tycho-user/msg03128.html) <p>Missing requirement (general)</p> <ul style="list-style-type: none">• Use features instead of plugins
