| Target version: | Release 4.11 | | |
| Severity: | normal | | |
| Description | | | |
| Somehow this is needed to correctly initialize the model fragments (specifically the one of the workbench plugin) in the correct order. After a full migration is done we will switch to one application model which we host ourselves and the other fragments extend this. Currently we are still using the e3-to-e4 bridge by extending the application model org.eclipse.e4.legacy.ide.application | | | |
