Hallo Katja,

du hattest doch glaube ich an der Reihenfolge der Ränge im Name Bulkeditor beim Anlegen eines neuen Namens gearbeitet.

Die Ränge sind jetzt sortiert, aber leider noch falsch rum (das liegt an der unintuitiven Reihenfolge bei den Ordered Terms).

Könntest du das noch ändern?

Außerdem habe ich das Ticket dazu gesucht. Gibt es eins? Wenn ja, bitte dem 4.7 zuordnen und schließen, sobald die Reihenfolge richtig ist, ansonsten bitte eins anlegen.

Unfortunately it is still in the wrong order. From the code <https://dev.e-taxonomy.eu/redmine/projects/edit/repository/taxeditor/revisions/bc1205e46dc994122c14d750e13ea0285059362c/diff> I also don't understand why there is an order at all. To me it looks like the data is stored in a map (result variable) so it can not be sorted.

The map is a treemap, this is a sorted map.
