

EDIT - bug #6645

area data parameter missing in portal/description/distributionInfoFor response

05/17/2017 05:18 PM - Andreas Kohlbecker

Status:	Closed	Start date:	
Priority:	New	Due date:	
Assignee:	Saskia Gennrich	% Done:	0%
Category:	data	Estimated time:	0:00 hour
Target version:		Found in Version:	
Severity:	major		
Description			
This problem seems to be specific to the Fauna Europaea data.			
http://test.e-taxonomy.eu/cdmserver/fauna_europaea/portal/description/distributionInfoFor/3610bdd7-7432-4d43-9f6e-6684deb82987.json?part=mapUriParams			
in the response the ad parameter is missing:			
<pre>{ "condensedDistribution": null, "elements": [], "tree": null, "class": "DistributionInfoDTO", "mapUriParams": "as=a:ffffff,,0.1, b:4daf4a,,0.1,&ad=&title=b:present a:absent" }</pre>

Gibt es hier schon neue Informationen?

Das sind glaub ich die zugehörigen Log-Nachrichten vom cdm-Server

```

#3 - 06/16/2017 11:05 AM - Andreas Kohlbecker

- Category changed from cdmllib to data

- Assignee changed from Andreas Kohlbecker to Saskia Gennrich

- Target version deleted (Release 4.8)

Hi Saskia,

this is only a problem of missing data. After a fresh import the mapping between the named areas and the map layer must established.
This is usually done by sending a special web service call to the server.

You will find the according URLs in the ticket #5653 (Establish mapping of fauna europeae area terms to the map layer)

This ticket also includes the required csv file and a hint on finding the required vocabulary uuid.

All the best
Andreas
