EDIT - feature request #6703

Improve title handling for media in dataportal

Description

Currently the dataportal prefers to display IPTC "Object Name" rather than CDM.Media.title.

The required preference should be:

- CDM.Media.title(localized)
- CDM.Media.titleCache(if protected)
- IPTC title (object name or caption)
- Fallback: CDM.Media.titleCache

This should be the case for all places (media page, image gallery, ...)
