@Andreas: I could not reproduce this behavior. Maybe this was fixed a while ago. Can you please test and close this ticket if it does not happen anymore?

#2 - 08/21/2018 03:30 PM - Andreas Müller

- Target version changed from *Unassigned CDM tickets* to *Release 5.3*

I did not get the IAE anymore but also could not create any result. I tried to

- Select or not select a taxon in taxon navigator
- enable or disable the "link" button in taxon navigator
- select or not select a taxon in the taxon filter of specimen tree editor
- for all this tried to use the "link with taxon selection"

with no result. Either the list was shown as usual or the filter went away and the label said "no taxon selected" (though a taxon was selected). So how is this intended to be used?

This works now.

We discussed to move the menu entry to an icon to make it more intuitive and present for the user.

Also discussed to allow null value for derivate type filter and multi select for taxon assignment.

Also label for taxon assignment could be changed to "assigned to taxon as "

All these issues will be new tickets.
