EDIT - bug #6761

classification/association problems during specimen import

06/27/2017 02:00 PM - Tilo Henning

Status:	New	**Start date:**	
Priority:	New	**Due date:**

Target version:	Unassigned CDM tickets		
Severity:	normal	**Found in Version:**	

Description

1. When importing specimen via an ABCD import, a new classification is generated instead of using the classification chosen before submitting the import.

2. An associated unit is not correctly attached to its specimen but instead is treated at the same hierarchical level and attached to the field unit during import. The import is not interpreting the association of the units correctly, although this information is provided by the dataset.
