

## Edit - bug #6764

### If no datasource is defined jetty exits without error message on console

06/28/2017 06:25 PM - Andreas Müller

#### Description

I started jetty from eclipse.

After

```
2017-06-28 18:19:40.841:INFO:oejshC.ROOT:main: Initializing Spring root WebApplicationContext
```

it stopped without giving any warnings or errors on the console.  
Only in the logfile I found the the missing datasource was the reason.

This should always be shown on the console, too.

original message from chat:

.... im log stand dann irgendwo

```
18:08:32,111 ERROR AbstractWebApplicationConfigurer:101 - property {cdm.datasource} not found.
18:08:32,111 ERROR AbstractWebApplicationConfigurer:102 - --> This property can be set in three optional ways:
18:08:32,111 ERROR AbstractWebApplicationConfigurer:103 - --> 1. as attribute to the Servlet Context
18:08:32,111 ERROR AbstractWebApplicationConfigurer:104 - --> 2. as system property e.g. -Dcdm.datasource
18:08:32,111 ERROR AbstractWebApplicationConfigurer:105 - --> 3. in ~/.cdmLibrary/cdmlib-remote.properties
18:08:32,111 ERROR AbstractWebApplicationConfigurer:106 - Stopping application
```

... hatte ich nicht gesehen, weil auch das falsche Logfile auf. Aber seltsam das auf der Console nichts kommt

#### History

- Description updated

**#2 - 06/29/2017 08:11 AM - Andreas Kohlbecker**

what was missing in your case andreas?

- the ~/.cdmLibrary/datasources.xml file
- the ~/.cdmLibrary/cdmlib-remote.properties file
- the bean definition in datasources.xml
