- Related to bug #6748: Linking between derivate view and facts/media view added

#4 - 07/11/2017 12:01 PM - Andreas Müller

- Status changed from Resolved to Feedback

- Assignee changed from Andreas Müller to Patrick Plitzner

Generally this works and the ticket can be closed.

The only "open" issue is that when e.g. going back to the NameEditor but clicking on another synonym as the before selected the details view rendering takes first place for the old selection and then again for the new selection. This makes it even slower than it is already.
Please feel free to create a new ticket for this and Katja, could you please link the new ticket to the one that already exists for faster rendering/creation of the details view?
