Still the result does not show up in the expected folder.

But also no final result page is shown so maybe the export was not complete. I tested with test-server/rem\_conf\_am. The result page should always be shown.

DwC-A should also be allowed to run on subtrees like CDM-light. This is not yet implemented on UI side but it is implemented in the export itself.

The later is handled in [#6800](#)

The result still does not show up in the expected folder.

However, the progress monitoring works now and also the result page shows up at the end.
