EDIT - feature request #6824

Mapping for Salvador areas

07/18/2017 12:47 AM - Andreas Müller

Status:	Closed	**Start date:**	
Priority:	Highest	**Due date:**	
Assignee:	Andreas Müller	**% Done:**	100%
Category:	data	**Estimated time:**	0:00 hour
Target version:	Salvador imported and published		
Severity:	normal		

Description

Suitable layer is available here:
http://edit.africamuseum.be/geoserver/topp/wms?service=WMS&version=1.1.0&request=GetMap&layers=topp:c_america_level_1&styles=&bbox=-92.221,5.5,-77.174,18.497&width=512&height=442&srs=EPSG:4326&format=application/openlayers (taken from http://edit.africamuseum.be/geoserver/web/)

An example here:
http://edit.africamuseum.be/edit_wp5/v1.2/areas.php?l=c_america_level_1&ad=c_america_level_1:code:a:La%20Libertad&as=a:8dd3c7,,1&ms=500

Example for taxon with map:
http://portal.cybertaxonomy.org/salvador/cdm_dataportal/taxon/a5aefc2c-e45c-45b7-a736-9526a3589ea6

Took code attribute as fid did not work for some reason.

Open issues:

- ~~Test all areas~~
- ~~Ahuachapán is not yet mapped correctly for some unclear reason (it works with static maps: http://edit.africamuseum.be/edit_wp5/v1.2/areas.php?l=c_america_level_1&ad=c_america_level_1:code:a:Ahuachapn&as=a:8dd3c7,,1&ms=500)~~ fixed by setting correct annotation type
- borders do not map very well with base layer

AK:

der webservice liefert einen kaputten query parameter string:

http://api.cybertaxonomy.org/salvador/portal/description/distributionInfoFor/eae896f0-3194-4b7b-a502-ad1d54ec36e6.json?recipe=EuroPlusMed&hiddenAreaMarkerType=&part=mapUriParams
--> "as=a:4daf4a,,0.1,&ad=&title=a:native"

Die ad werte fehlen hier.

Ich vermute dass das Shapefile Mapping des Area terms nicht stimmt.

===

AK: ... das mapping stimmt!
dann muss es ein Bug in cdmlib sein.
