Description

When you perform a save operation while editing a User, the selection is reseted to the first user in the list.
If this is not recognized by the person editing users it can happen that further edits are applied to the wrong user.

I guess that his bug also accounts to the Groups editor.

History

#1 - 07/18/2017 11:40 AM - Andreas Müller

- Assignee changed from Andreas Müller to Katja Luther

- Severity changed from normal to major

- Found in Version set to Release 4.8

Is this a general behavior of bulk editors?
