Description			
A date like 2017-04-06 21:02:52 (Salvador.Media.id=10) is shown as 2017-4-6 21:2 in the supplemental data view.			
We should try to format this in a consistent way, always using YYYY-MM-DD HH:MM also if some of the values are "0". This is most critical for the minutes which look really strange this way.
