

EDIT - bug #6896

date selection corrupted

08/07/2017 04:18 PM - Tilo Henning

Status:	Worksforme	Start date:	
Priority:	New	Due date:	
Assignee:	Tilo Henning	% Done:	0%
Category:	taxeditor	Estimated time:	0:00 hour
Target version:		Found in Version:	
Severity:	normal		
Description			
The date selection tool in the details field for media derivatives (and likely other) shows june if july is selected. Don't know whether this is alsos buggy for other dates, but for july its a permanent error.

- Status changed from New to Feedback

Hi Tilo,

please update to the latest TaxEditor version 4.9.1 and refer to the release notes:

Dear TaxEditor users,

A hotfix has been released for the TaxEditor 4.9.0. The hotfix version is 4.9.1. It fixes 2 issues in TaxEditor version 4.9.0:

- Exception when trying to open the Specimen Tree Editor
- Incorrect month stored by date picker (relevant for media creation date, DNA quality check date, reference (website) accessed date and specimen preparation date

If these issues are not relevant for you it is not obligatory to install the new hotfix version.

Installation Note: For the last release we notified you about potential problems with automatic update via "Help" > "Check for Updates". This also accounts for this hotfix release. This problem is probably related to the migration from eclipse3 to eclipse4 which came with version 4.7. In case the update does not work please download the version from <http://cybertaxonomy.eu/download/taxeditor/stable/> and reinstall by unzipping.

All the best
The EDIT team

Can we close the ticket as "Worksforme" or "Duplicate"?

#2 - 08/07/2017 08:27 PM - Andreas Müller

- Assignee changed from Andreas Müller to Tilo Henning

#3 - 08/09/2017 11:27 AM - Patrick Plitzner

- Status changed from Feedback to Worksforme

issue has already been fixed with Hotfix 4.9.1
