

EDIT - bug #6915

Delete does not work in media view for taxon

Target version:	Release 4.10	Found in Version:	
Severity:	normal		
Description			
I tried to delete an image which belongs to an image gallery of a taxon.			
None of the delete options of the configurator work because it says that the media is still connected to a taxon. The image is removed from the view but it re-appears when the view is refreshed.

this was because the object from where the media should be deleted is not set in the configurator, this is fixed with b294e97e70881eecbe12dc58882934cf6b96df52

Deleting works but only with the second option "Remove ... and delete teh media completely...". The other two options never delete the image if the gallery is attached to a taxon

#6 - 08/17/2017 12:49 PM - Katja Luther

now all delete options are working, also the problem that while delete one media from a gallery removed the whole gallery is fixed. The remaining issue is the missing refresh in taxeditor.

Is the remaining issue also fixed now (or moved to another ticket)?
