

EDIT - bug #6924

Taxon name incorrect after swap synonym with accepted taxon

08/29/2017 05:15 PM - Patrick Plitzner

Status:	Worksforme	Start date:	
Priority:	New	Due date:	
Assignee:	Patrick Plitzner	% Done:	0%
Category:	taxeditor	Estimated time:	0:00 hour
Target version:	Release 4.11	Found in Version:	
Severity:	normal		
Description After I swapped the synonym with the accepted taxon it seems like only the name has changed but not the taxon. Before the taxon was <i>Abiess</i> and the synonym was <i>Abiecs</i> (see attached screenshot) Please change Category if this is actually a cdmlib issue.

- Target version changed from Unassigned CDM tickets to Release 4.11

is this still an open issue?

#2 - 11/02/2017 12:33 PM - Katja Luther

- Status changed from New to Worksforme

- Target version deleted (Release 4.11)

No, I think this was a refresh problem of the details view

#3 - 11/02/2017 12:42 PM - Andreas Müller

- Status changed from Worksforme to Resolved

Patrick, can you finally review this as you created the ticket?

#4 - 11/02/2017 02:34 PM - Patrick Plitzner

- Status changed from Resolved to Feedback

- Target version set to Release 4.11

This is still the same for me. The taxon and synonym swap in the editor but in the details view and in the title of the name editor it still shows the old name. Even after reconnect.

#5 - 11/02/2017 02:45 PM - Katja Luther

really strange for me it works, but the last time I did it, an nearly empty message dialog pops up

no log message but in eclipse: WARN [eu.etaxonomy.taxeditor.editor.name.e4.handler.SwapSynonymAndAcceptedHandlerE4\$1] -

but reopening shows the correct result

The strange message should be fixed now. But still the problem is the same. I attached another screenshot. Syn is selected which is now the accepted taxon after swapping but in the details view you see that the taxon is still Acc. Only the name is Syn.

very strange... I tested again with the actual nightly build and it works for me, in the screenshot syn was the synonym and is now the accepted taxon

@AM: Could you test this on your machine and see if you can reproduce that behavior?

#10 - 11/07/2017 11:02 AM - Andreas Müller

- Assignee changed from Andreas Müller to Patrick Plitzner

I can't reproduce the problem. The only refresh problem I see is that the navigator is not refreshed and still shows the old accepted taxon instead of the new one. Should we create a new ticket for this?

But it is true that only the name is changed. The Taxon and Synonym objects are kept. This you can see by comparing IDs in supplemental data. Also the sec reference is not changed and stays with the according TaxonBase. Usually this is not an issue as most Synonyms have the same sec as the accepted taxon, but there are exceptions. Maybe we should show a dialog asking if the sec references should be kept or also switched for cases where the sec references are not equal. Also keeping the id might be not wanted in some cases. But these are all different issues.

Patrick did you test with nightly or from IDE? Did you also test with Windows?

#11 - 11/07/2017 01:25 PM - Patrick Plitzner

I only tested from IDE and on linux

#12 - 11/07/2017 01:51 PM - Andreas Müller

Could you test with nightly, and if still there with Windows?

#13 - 11/07/2017 02:00 PM - Patrick Plitzner

With the current nightly it worked. The details view show the correct name.

#14 - 11/07/2017 02:12 PM - Andreas Müller

- Status changed from Feedback to Worksforme

OK, so I close the ticket as works for me?

#15 - 11/07/2017 02:54 PM - Andreas Müller

- Copied to bug #7067: Improve swap accepted with synonym configurable added

#16 - 11/07/2017 02:54 PM - Patrick Plitzner

ok

#17 - 11/07/2017 02:55 PM - Andreas Müller

moved new issues from [#note-10](#) to new ticket [#7067](#)
