Target version:	Release 4.11		
Severity:	normal		
Description			
in #6959 the display of Registration metadata in a Drupla block has been implemented.			
Since a Taxon page can contain multiple Registrations the approach to display this data in a block is not really appropriate. Therefore we decided to show the Registration metadata together with the reference footnote.			
Planothidium victori is a good example since it has two nomenclatorial acts a registration for each.			
The Registration metadata will be appended to the reference:			
<pre>{footnoteky} {reference} Registration: {Registration.identifier} {Registration.registrationDate as ISO-Date}</pre>
