EDIT - feature request #7020

Allow SpecimenOrObservationBaseVoter to make futher voting decision on base of multiple authorities

10/17/2017 03:50 PM - Andreas Kohlbecker

Status:	New	**Start date:**	
Priority:	New	**Due date:**	
Assignee:	Andreas Kohlbecker	**% Done:**	0%
Category:	cdmlib	**Estimated time:**	0:00 hour
Target version:	Unassigned CDM tickets		
Severity:	normal		

Description

DerivedUnits and DerivationEvents can form graphs with multiple roots.

```
fuA -- duA
          \
           duAB -- du2
          /
fuB -- duB
```

In order to modify du2 it is either necessary to have the per entity authority for

*(1) duAB, as mentioned above, or
*(2) for fuA AND fuB.

(1) has been implemented in [#7018](#) but the second (2) approach is however not feasible with the current CdmAuthorities and the CdmPermissionVoter.furtherVotingDescisions((CdmAuthority cdmAuthority, Object object, Collection<ConfigAttribute> attributes, ValidationResult validationResult) which is only able to operate on one CdmAuthority at the same time. To make it possible to validate permissions as in (2) it would be needed to pass all CdmAuthority for which the voter is responsible for to the furtherVotingDescisions method.
