Description

The tabs Register and PasswordRecovery need to be configurable, since not all projects will need or want to offer these functions.

The visibility of these tabs should be made configurable via the
~/.cdmLibrary/remote-webapp/{instance-name}/vaadin-apps.properties file.

Suggested property names:

```
cdm-vaadin.component.LoginDialog.TabRegister=true
cdm-vaadin.component.LoginDialog.TabPasswordRecovery=true
```
