

EDIT - bug #7074

Use TimePeriod for Media.mediaCreated

11/11/2017 08:38 PM - Andreas Müller

Status:	Closed	Start date:	
Priority:	Highest	Due date:	
Assignee:	Andreas Müller	% Done:	100%
Category:	cdm	Estimated time:	0:00 hour
Target version:	CDM UML 5.0	Found in Version:	
Severity:	critical		
Description			
<p>For older images it is often not exactly known when the picture was taken/created. In flora of Greece we sometimes have information such as "spring 1888" or "April 1986". This can not be handled with the current DateTime implementation.</p> <p>Also the exact time is not always known, especially if you enter date manually.</p> <p>Maybe we can have an extra hibernate user type which also allows to handle time if available.</p> <p>Once this is finished, we need an update script and we need to update data from flora of Greece image import, images made by N. Turland. #7092</p>
