

Edit - bug #7099

Make CdmAuthority a persistable class

11/30/2017 12:35 PM - Andreas Müller

Status:	New	Start date:	11/30/2017
Priority:	Priority14	Due date:	
Assignee:	Andreas Müller	% Done:	0%
Category:	cdm	Estimated time:	0.00 hour
Target version:	CDM UML 5.5	Found in Version:	
Severity:	normal		
Description			
We need a persistable Authority base class which will then be extended by classes Role and CdmAuthority. It will replace the existing GrantedAuthorityImpl.			
We need the following fields for CdmAuthority:			
<ul style="list-style-type: none">• permissionClass (hibernate user type for the enum required)• property (String)• operation (hibernate user type for enumSet required)• targetUuid			
NOTE: first read #7100 which extends this model change			
For Role we only need:			
<ul style="list-style-type: none">• role (String, or if Role becomes an enum, => enum user type)
