

EDIT - bug #7138

unitils.dbunit data set loading does not work for CdmIntegrationTest

12/13/2017 12:16 PM - Andreas Kohlbecker

Status:	New	Start date:	
Priority:	New	Due date:	
Assignee:	Andreas Müller	% Done:	0%
Category:	cdmlib	Estimated time:	0:00 hour
Target version:	Unassigned CDM tickets	Found in Version:	
Severity:	normal		
Description			
when using @DataSource to load a test data set for a test class which extends CdmIntegrationTest, the test db is always empty.			
Switching the super class to CdmTransactionalIntegrationTest solves the problem, but it should be possible to write test for operations which work outside of a transactional context.
