I replaced all occurrences in cdmlib poms by copies taken from cdmlib-cache. However, I am not sure if it is correct now, as something like dev.e-taxonomy.eu/git/cdmlib-cache.git does not really exist IMO.

For the given URL the old value <https://dev.e-taxonomy.eu/gitweb/cdmlib-cache.git/tree> was definitely wrong. I replaced it by <https://dev.e-taxonomy.eu/gitweb/cdmlib.git/tree/HEAD/cdmlib-cache/> (similar for all other poms).

I am not sure if we need these entries at all, as the important entry is in the parent pom. The module poms scm entries do not seem to be used. The TaxEditor modules e.g. do not have an scm entry at all, only the parent.

Please review.

P.S. Does anybody know if these entries are necessary or could we remove them?

the scm entries in the sub-modules are not needed as the source repository page of the doc site is only showing the entries of the parent project: <https://cybertaxonomy.eu/cdmlib/source-repository.html>

--> **TODO:** remove these obsolete entries!
