

EDIT - feature request #7235

Make available area vocabularies a database preference for TaxEditor distribution editor

02/01/2018 11:14 PM - Andreas Müller

Status:	Closed	Start date:	
Priority:	New	Due date:	
Assignee:	Patrick Plitzner	% Done:	100%
Category:	taxeditor	Estimated time:	0:00 hour
Target version:	Release 5.4		
Severity:	normal		
Description			
See also similar implementation for Vaadin distribution editor (part of #6903).			
Vaadin example exists for cuba.			
Alternatively we may define a list of single terms, but probably we should leave it as it is and later use defined term lists/sets once they exist.

- % Done changed from 60 to 100

This works fine now. There are open issues with the setting of the local areas to be used. But this is another ticket.

Very good is, that local area selections are removed if the according vocabulary is removed from the DB preferences.

Only "local override" does not yet exist and therefore should the checkbox in DB prefs should be disabled.

(Note: local preferences currently only allow selection of single areas within the given vocabulary/ies) .

Patrick, can you please disable the checkbox and always set it to false if, and only if, a value for "distribution.area.voc" exists? Only if no vocabulary is selected it should be set to true, as true is always the default (once the default values are implemented correctly)

Sorry, this was partly not correct. Local preferences do allow setting vocabularies, too. However it does not work as expected: [#7856](#).

Relevant for *this* ticket is only that currently the "allowOverride" is not saved to the DB if it is set to "true". This still needs to be fixed. Disabling the checkbox is not necessary.

- Status changed from *Resolved* to *Closed*
- Assignee changed from *Andreas Müller* to *Patrick Plitzner*
- % Done changed from 90 to 100

I think we can close this ticket. All open (and maybe new issues) on handling the Pref in the UI will be handled in [#7856](#) or [#7849](#)
