Description

the redmine api key of the user admin is currently stored in the file cdmlib-ext/src/test/resources/services-external.properties which is managed in git:

this file should not directly contain the api key but a placeholder, like e.g.:

```
registrationMessageService.redmine.adminUserApiKey={secret:registrationMessageService.admin
nUserApiKey}
```

The actual value could be stored e.g. in ~/.cdmLibrary/****.properties
