Description
By solving #7206 the CdmTransientEntityCacher has been moved from the taxeditor project into a new cdmlib module.
The Taxeditor now needs to be adapted so that it also uses the Cacher provided by the new package.

Hallo Katja,

das sollte relativ einfach sein:

1. Subclass von CdmTransientEntityCacher: Zb: ConversationalTransientEntityCacher, Diese klasse implemntiert dann all die Methoden die im CdmTransientEntityCacher auskommentiert wurden.
2. Alle Klassen die in eu.etaxonomy.cdm.cache vorkommen im editor löschen.

Viele Grüße
Andreas

Hi Katja,

I did reviewing your changes.

All Classes which have moved to cdmlib-cache are removed from the taxeditor. And the switch to the classes now provided by the cdmlib-cache package looks clean and ok. Since the integration tests are all running successful I consider this taks as completed.

I just discovered that at least one changeset from the taxeditor project (taxeditor|98baf5f8) which fixed a bug #6389 has not yet been incorporated into cdmlib-cache. This is of course also one of the tasks to accomplish for this issue.

all changes since Fri Jan 19 17:23:04 2018 +0100 need to be considered being a candidate to patch over cdmlib-cache
Theses are:

```
* 98baf5f – Tue, 27 Feb 2018 14:30:33 +0100 (3 weeks ago)
|   fix #6389 Fixed cache loader method – Patrick Plitzner
* e25b303 – Wed, 24 Jan 2018 14:46:03 +0100 (8 weeks ago)
|   quick fix for #7212 in taxeditor – Katja Luther
```

I cared for taxeditor|98baf5f (#6389)

taxeditor|e25b303 (#7212) seems to be already in cdmlib. I think we can close this ticket. please review if you think everything is ok.

- % Done changed from 50 to 100

looks ok now!
