

EDIT - bug #7337

creating of new NameTypeDesignation for empty registration ends up without typified name

03/28/2018 04:00 PM - Andreas Kohlbecker

Status:	Closed	Start date:	
Priority:	Highest	Due date:	
Assignee:	Andreas Kohlbecker	% Done:	100%
Category:	cdm-vaadin	Estimated time:	0:00 hour
Target version:	Release 5.0	Found in Version:	
Severity:	critical		
<b>Description</b>			
The typifiedName is retrieved either from existing nameTypeDesignations or the Registration.name is being used instead. This fails however if it is a new Registration for an existing name.			
As a solution the information on the typifiedName should be transported with the TypeDesignationWorkingsetEditorAction
