| Description | | | |
| Walter: "ich habe bei den User defined features aus Versehen einen „Unterterm“ eingefügt. Wenn ich im Kontext Menü „Löschen“ wähle, löscht er zwar, aber das Fenster wird nicht aktualisiert – das gelöschte verschwindet erst, wenn man den Editor schließt und wieder öffnet." I could reproduce this behavior: <ol style="list-style-type: none">1. Open term editor2. Create your own vocabulary3. Create a defined term in the vocabulary4. Create a defined term as a sub term of the previous one5. Save (With implementing DTOs in the term editor saving is not needed at this step)6. Delete the sub term. | | | |
