| Description | | | |
| <p>The TitleAndNameCacheAutoInitializer has been adapted in turn of the reactoring for #6368. But the changes applied in e6d7b501 and 9dc896c9 turn the code in the initialize() method into an irritating if else if else sequence which cant be correct:</p> | | | |
| <pre>if(bean instanceof TaxonName){ // ----> NonViralName ... } else if(bean instanceof TaxonName) { // ----> TaxonName } ...</pre> | | | |
