

EDIT - bug #7389

NameTypeDesignationEditor typifiedNamesComboBoxSelect always is readonly

04/28/2018 05:26 PM - Andreas Kohlbecker

Status:	New	Start date:	
Priority:	New	Due date:	
Assignee:	Andreas Kohlbecker	% Done:	0%
Category:	cdm-vaadin	Estimated time:	0:00 hour
Target version:	Unassigned CDM tickets	Found in Version:	
Severity:	normal		
Description			
this is the same problem as with the TaxonNamePopEditor described in #7386			
For the NameTypeDesignationEditor the problem is the missing TypeDesignationBase.setTypifiedNames() method which causes the typifiedNamesComboBoxSelect field being set readonly due to the missing setter.
