  - Subject changed from ExternalLinks should be shown in DataPortal to OriginalSourceBase.links should be shown in DataPortal
  - Description updated

First of all we need to discuss how and where the links are to be shown.

- in the sidebar, e.g. in the external links block?
- next to the identifiable element in the text?

This ticket is about **OriginalSourceBase.getLinks()** so these are links for sources not for identifiable entities. Therefore the links should show up with the sources in the reference block, nowhere else. Maybe in future we will also have `IdentifiableEntity.links` and we may then discuss where to show these.
