Works now and ticket can be closed.

However, I realized that the status in the drop down are not sorted at all. We should try to do this to make searching easier.
One possibility is to use natural order as the vocabulary is OrderedVocabulary. However, the existing order does not make much sense. So I guess an alphabetical order makes more sense.
If this is easy to fix you may do this within this ticket. Otherwise feel free to open a new one.

We may also move the most important ones to the top (nom. illeg., nom. inval., +?), and the rest being sorted alphabetically).

Critical: ohh, there is an open issue.
When only creating the new status but not explicitly selecting nom. illeg. "not defined" shows up in name editor (see attachement). Even after reopening this does not change.
