

EDIT - feature request #7429

Improve parsing and formatting for VerbatimTimePeriod

05/18/2018 10:08 AM - Andreas Müller

<b>Status:</b>	Closed	<b>Start date:</b>

<b>Target version:</b>	Release 5.2		
<b>Severity:</b>	normal		
<b>Description</b>			
In <a href="#">#6752</a> only very basic parsing and formatting functionality has been implemented for verbatimDate. Parsing supports "realdate ["verbatimYear"]"			
For parsing we may want to support further formats like			
<ul style="list-style-type: none"><li>• "<del>verbatimDate</del>" [<del>realdate</del>]</li><li>• <del>verbatimDate</del> publ. <del>realdate</del></li><li>• verbatimDate [realdate] or the other way round, but this is very critical as it is unclear which data is the real date and which is the verbatim date</li><li>• <del>same as all above, but with other quotations marks such as ' or English quotation marks</del></li></ul>			
Also we need parsing of verbatim date in NonViralName parser (maybe we should merge these 2 somehow). But be careful to distinguish from original name parsing (a possible original name should not be recognized as a verbatim date).			
===			
Formatting:			
<ul style="list-style-type: none"><li>• decision which format should be the default format =&gt; for now we take realdate ["verbatimDate"]</li><li>• Allow defining formats =&gt; this is a general issue for all format and will not be solved here</li></ul>
