Description

The verbatimDate is stored e.g. in RefDetails notes in different formats.

These need to be parsed (see also [#7429](#)) and imported.

Also it might be stored in other notes fields (nameNotes, reference notes, ...). => need to store in one place (which one?).

Known formats are:

- 1932 [1931] - (with 1931 beeing the verbatim date)
- TBC
