<b>Description</b>			
For now we implement it only for fungi and zoological names. Need to check first if it exists for botanical names, too.

Should be fixed. Please review.  
Maybe formatting still needs to be checked as this time I only worked on parsing.

Could you give me an example?

In rem-conf-am there in Testklass there is a taxon "Fungi (E.D.Clarke ex B.D.Jacks. & L. in Z.E.Chao & Z.H.Shen) E.A.Busch ex L. in V.A.Shultz" and its child. Currently it is Fungus but you may also check to change to ICN or ICNafp.

Adding the name mentioned above for a new fungi name works as expected, but for zoological names it does not work

For botanical names it does not work either, but this is what I expected.

Yes, of course it does not work without adding years as zoological names require years for correct parsing.

Ok, then we can close the ticket.
