

## Edit - task #7455

### [Check] Check all markers for correctnes

06/07/2018 01:21 PM - Andreas Müller

|                        |                    |                        |            |
|------------------------|--------------------|------------------------|------------|
| <b>Status:</b>         | Resolved           | <b>Start date:</b>     | 06/07/2018 |
| <b>Priority:</b>       | Highest            | <b>Due date:</b>       |            |
| <b>Assignee:</b>       | Andreas Müller     | <b>% Done:</b>         | 0%         |
| <b>Category:</b>       | cdmadapter         | <b>Estimated time:</b> | 1.50 hour  |
| <b>Target version:</b> | Euro+Med Migration |                        |            |
| <b>Severity:</b>       | normal             |                        |            |

**Description**

Check if all existing markers are still up-to-date with the current E+M import strategy.

```
SELECT flag, dtb.titleCache, count(*) as n
FROM Marker m INNER JOIN DefinedTermBase dtb ON dtb.id = m.markerType_id
GROUP BY flag, titleCache
ORDER BY n, titleCache, flag;

SELECT deb.DTYPE, deb.feature_id, dtb.titleCache
FROM DescriptionElementBase deb
INNER JOIN DescriptionElementBase_Marker MN ON MN.DescriptionElementBase_id = deb.id
INNER JOIN Marker m ON m.id = MN.markers_id
INNER JOIN DefinedTermBase dtb ON dtb.id = m.markerType_id
ORDER BY deb.DTYPE, dtb.titleCache
```

The most important decision is the publish flag on distributions. Is it needed?

picture714-1.png

### History

#1 - 06/07/2018 01:22 PM - Andreas Müller

- Tags set to euro+med

#2 - 06/07/2018 01:24 PM - Andreas Müller

- Estimated time set to 1.50 h

some interesting queries:

```
SELECT m.markerType_id, dtb.titleCache, count(*) as n
FROM Marker m
INNER JOIN DefinedTermBase dtb ON dtb.id = m.markerType_id
GROUP BY m.markerType_id, dtb.titleCache
ORDER BY m.markerType_id
```

```
SELECT tb.publish, tb.titleCache, m.markerType_id, dtb.titleCache
FROM TaxonBase_Marker MN
INNER JOIN TaxonBase tb ON MN.TaxonBase_id = tb.id
INNER JOIN Marker m ON m.id = MN.markers_id
INNER JOIN DefinedTermBase dtb ON dtb.id = m.markerType_id
ORDER BY m.markerType_id
```

```
SELECT m.markerType_id, dtb.titleCache
FROM DescriptionElementBase_Marker MN
INNER JOIN Marker m ON m.id = MN.markers_id
INNER JOIN DefinedTermBase dtb ON dtb.id = m.markerType_id
GROUP BY m.markerType_id, dtb.titleCache
ORDER BY m.markerType_id
```

**#3 - 06/12/2018 10:28 PM - Andreas Müller**  
- Category changed from cdmlib to cdmadapter

**#4 - 09/20/2018 03:58 PM - Andreas Müller**  
- Status changed from New to In Progress  
- Priority changed from New to Highest

**#5 - 09/20/2018 07:17 PM - Andreas Müller**  
- Description updated

**#6 - 09/20/2018 07:17 PM - Andreas Müller**  
- Description updated

**#7 - 09/20/2018 07:18 PM - Andreas Müller**  
- File picture714-1.png added  
- Description updated

**#10 - 09/27/2018 03:47 PM - Andreas Müller**  
- Priority changed from Highest to Priority14

The publish flag (=false) is related to distributions with no status in BM. This is handled now in #2764 and #4822

**#11 - 09/29/2018 12:41 PM - Andreas Müller**  
- Subject changed from E+M: Check all markers for correctnes to [Check] Check all markers for correctnes

**#12 - 09/29/2018 12:41 PM - Andreas Müller**  
- Priority changed from Priority14 to Highest

**#13 - 03/28/2019 07:34 PM - Andreas Müller**  
- Status changed from In Progress to Resolved

After import we should still check if need those markers with small count. Therefore do not close completely.
