<b>Description</b> Submitters need to add notes the names and type designations they are entering.  There should be one note field only per editor.  The note field should be placed above the Save, Delete and Cancel buttons as last section of the content area.  We will use cdm annotations to store these notes in the database of the type AnnotationType.EDITORIAL.  In case multiple annotations of this type are existing for the entity to which the "Note" is attached all Annotations will be shown.  For the different editors the "Note"-Annotation needs to be associated with different entity types: <ul style="list-style-type: none"><li>• TaxonNameEditor: "Note"-Annotation &lt;---- TaxonName</li><li>• NameTypeDesignationEditor: "Note"-Annotation &lt;---- FieldUnit</li><li>• SpecimenTypeWorkinsetEditor: "Note"-Annotation &lt;---- NameTypeDesignation</li></ul>
