EDIT - feature request #7501

Deduplicate MANs and pro parte synonyms in portal results

06/19/2018 05:04 PM - Andreas Müller

Status:	New		**Start date:**

Target version:	Unassigned CDM tickets			
Severity:	normal			

Description

Currently, if searching for a MAN//ppSyn which is related to >1 accepted taxon, the search shows 2 (or more) equal entries. Clicking on each of them opens the different accpeted taxa.

Better, there should be only 1 entry, clicking on it, the result opens a further choice which accepted taxon to open.

This already had been implemented for simple synonyms when they were still related to taxa via synonym relationships, but has been removed after.

Maybe this can be done when synonym code is cleaned up in #7493 (as code was already there in and only needs to be slightly adapted).

Currently an example is *Hedysarum confertum* sensu Greuter & al. in E+M (Note: this might be set to unpublished, so first set to publish before testing).
