Description Copied from #7439 : <ul style="list-style-type: none">• If the whole row has the focus we may want to copy all fields in csv or tsv format.• For multi-select copy is not yet possible but might be a very nice feature (e.g. for copy and paste larger datasets to Excel)• see also #7439#note-27 This might be easily solved by changing the current selection model which is still "full row selection"
