

Edit - bug #7514

Change direct and inverse symbol for pro parte synonym and misapplied name relationship types.

06/26/2018 04:35 PM - Andreas Müller

Status:	Resolved	Start date:	06/26/2018
Priority:	Highest	Due date:	
Assignee:	Andreas Müller	% Done:	50%
Category:	cdm	Estimated time:	0.00 hour
Target version:	CDM UML 5.5	Found in Version:	
Severity:	critical		
Description			
To have a consistent reading we need the current symbol to be the invers symbol as we show usually the inverse relationship on a taxon page. E.g. Accepted Taxon X has pro parte synonym Y (which is the inverse relationship) see also #7656

History

#1 - 06/26/2018 04:36 PM - Andreas Müller

- Related to feature request #7417: Make pro parte and partial synonym relationships always visible in data portals added

#2 - 09/17/2018 12:17 PM - Andreas Müller

For misapplied names (we may think about using a larger dash, also maybe change idInVocabulary)

```
UPDATE DefinedTermBase
SET symbol='--' , inverseSymbol = '-'
WHERE uuid= '1ed87175-59dd-437e-959e-0d71583d8417';
```

```
UPDATE DefinedTermBase
SET symbol='--(p.p.)' , inverseSymbol = '-(p.p.)'
WHERE uuid= 'b59b4bd2-11ff-45d1-bae2-146efdeee206';
```

```
UPDATE DefinedTermBase
SET symbol='--(part.)' , inverseSymbol = '-(part.)'
WHERE uuid= '859fb615-b0e8-440b-866e-8a19f493cd36';
```

#3 - 09/17/2018 12:17 PM - Andreas Müller

- Status changed from New to In Progress

- Priority changed from New to Highest

- Severity changed from normal to critical

Critical because in use already

#4 - 09/17/2018 12:17 PM - Andreas Müller

- % Done changed from 0 to 20

#5 - 09/17/2018 12:32 PM - Andreas Müller

... and for pp Synonyms

```
UPDATE DefinedTermBase
SET symbol='>p.p.' , inverseSymbol = 'p.p.'
WHERE uuid= '8a896603-0fa3-44c6-9cd7-df2d8792e577';
```

```
UPDATE DefinedTermBase
SET symbol='>part.' , inverseSymbol = 'part.'
WHERE uuid= '9d7a5e56-973c-474c-b6c3-alc00833a3c';
```

#6 - 09/17/2018 12:33 PM - Andreas Müller

... and don't forget to adapt csv files.

AM an WGB:

die MANs sollten jetzt auch sichtbar sein und hoffentlich besser formatiert. Ein Problem ist noch, welche Symbole für den Relationstyp verwendet werden sollen. Insbesondere für die Richtung der Relationen, die eher unüblich ist. Z.B. *Nepenthes gracillima* und *N. ramispina*:

http://caryophyllales.org/nepenthaceae/cdm_dataportal/taxon/8746d8c3-fa0a-4d6f-9fdb-11b77fb0a8fd

http://caryophyllales.org/nepenthaceae/cdm_dataportal/taxon/152af9db-a539-44c0-8047-f26091a73b9b

N. gracilima ist dabei MAN für *ramispina*. Das ist auf der *N. ramispina* Seite auch wie gewöhnlich formatiert und angezeigt. Auf der *N. gracilima* Seite wird die andere Richtung angezeigt. Ich habe das provisorisch erstmal mit einem doppelten Bindestrich symbolisiert, um nicht zu sehr abzuweichen, aber auch nicht das gleiche Symbol zu verwenden.

Wir bräuchten also Symbole für alle Richtungen für alle 5 Beziehungen MAN, ppMAN, partialMAN, ppSyn, partialSyn.

Derzeit verwenden wir - / --; -(p.p.)/--(p.p.) ; -(part.) / --(part.) ; p.p. / ⊃p.p. ; part. / ⊃part.

Die Symbole sind in der DB gespeichert, können also jederzeit noch angepasst werden. Aber wir sollten sicherlich diskutieren, welche am sinnvollsten sind als default.

the test page http://int.e-taxonomy.eu/dataportal/integration/reference/cdm_dataportal/taxon/c6716cee-2039-4ba8-a239-4b1b353f9c84/synonymy provides a "wild" combination of various MANs. Maybe you want to check the output there to see the new symbols in action.
